

Noah Spies

Department of Pathology
Stanford University School of Medicine

and

Genome-scale Measurements Group
National Institute of Standards and Technology

Phone: (607) 279 – 8310

Email: [please use my Stanford address: nspies]

Education

- 2012–
present **Stanford University School of Medicine**
Postdoctoral associate
Laboratory of Professor Arend Sidow, Departments of Pathology and Genetics
Research focus: *genome evolution during development and tumorigenesis*
Co-advised (since 2014) by Dr. Marc Salit, NIST
- 2006–2012 **Massachusetts Institute of Technology**
Ph.D. in Biology, June 2012
Jointly advised by Professors David P. Bartel and Christopher B. Burge
Thesis: *Cross-regulation and interaction between eukaryotic gene regulatory processes*
- 2002–2006 **Cornell University**
Bachelor of Arts, May 2006
Cum laude in Mathematics, with a concentration in Computer Science
Cumulative GPA: 3.77

Awards

- 2016 **Best Talk Award, ISMB HiTSeq Conference**
Awarded best talk at HiTSeq, a special interest group of the ISMB conference (annual meeting of the International Society for Computational Biology) for presentation of Genome-wide Reconstruction of Complex Structural Variants using Read Clouds
- 2014–2016 **NRC/NIST Postdoctoral Award**
Awarded competitive postdoctoral fellowship by the National Research Council and the National Institute of Standards and Technology for work in genomics
- 2013 **Stanford CEHG Trainee Grant**
Awarded competitive \$15,000 trainee research grant by the Stanford Center for Computational, Evolutionary and Human Genomics
- 2008 **Teresa Keng Graduate Teaching Prize**
Awarded by the MIT Biology Department for excellence in teaching 7.57: Quantitative Biology for Graduate Students

Other Research Experience

- 2004–2006 **Steve Zinder Lab, NSF Microbial Observatory, Cornell University (Ithaca, NY)**
Developed methods to characterize populations of homoacetogenic bacteria
- 2001–2002 **Karl Schmid Group, Max Planck Institute for Chemical Ecology (Jena, Germany)**
Bioinformatics internship in plant population genetics (8 months)

Teaching

- June 2011 **MIT Teaching Certificate Program**
Completed month-long MIT teacher training program
- Jan 2010, 2011, 2012 **Quantitative biology workshop, MIT**
Developed and led mini-course on biostatistics with R for minority undergraduates and faculty
- 2010 **Teaching Assistant, 7.02: Introduction to Experimental Biology, MIT**
Graduate Teaching Assistant for introductory biology laboratory course for MIT undergraduates
- 2008 **Teaching Assistant, 7.57: Quantitative Biology, MIT**
Graduate Teaching Assistant for quantitative biology course for first-year graduate biology students, covering statistics, sequence analysis and systems biology
- 2005 **Computer Science 381/481 Teaching Assistant, Cornell University**
Undergraduate Teaching Assistant for (honors) theory of computing course

Service

- 2015–present **Geneticists for Diversity in Science (GDS) Volunteer**
Organize mentoring and networking events for students and postdocs in the biosciences
- 2012–2015 **49ers Academy Volunteer**
Help teach science lab classes to at-risk middle-school students in East Palo Alto charter school as part of a Stanford program
- 2010–present **Contributor to open source software**
Active member of online open source community, authoring svviz, a read visualizer for structural variants, and grocsvg, which detects and characterizes structural variants from 10x Genomics read cloud data; and contributing bug reports, fixes and improvements to data science and bioinformatics tools, including freebayes, pandas and pysam
- 2010–2011 **Executive Committee, MIT Science Policy Initiative**
Helped run graduate student organization dedicated to improving engagement between scientists, engineers and policymakers, with annual budget of over \$10,000

Publications
